## Technology Product Sheet

# WORKWARE

## SIMULTANEOUS SHARING EXPERIENCE

Whether you work together around a table or around the world, Workware lets multiple users connect, share, and keep ideas flowing. With a wireless connection solution, you can collaborate easily and inspire team creativity in any location. A comprehensive line of monitor supports and other components integrate with Haworth furniture for a clean aesthetic.

Workware Wireless supports simultaneous sharing and communication for multiple users in real time and supports security on an enterprise level. Content sharing is simple and intuitive regardless of your physical location or device. Workware Wireless Pro enables everyone to actively participate and contribute well beyond the four walls of the conference room.

With media file sharing and app window sharing, you can work behind the scenes and maintain computer privacy. A simple touchpad gives you complete control of the monitor, wireless, and video conferencing functions. Conference technology as its best.

## DETAILS

**DESIGNED** by Ryan McClymonds for Haworth Design Studio

**ANDROID OPERATING SYSTEM** enables a new world of opportunities to work with.

**WORRY-FREE WIRELESS CONNECTIVITY** is built into your existing network infrastructure, taking advantage of your existing firewalls and other security features. Additionally, you can generate a global password or a standard code with 4 digits login code for secure access to protect your information.

An uninterrupted **EXCHANGE OF INFORMATION** is essential for communication and creative problem-solving in groups. That's just what Workware connect was designed to bring to the workplace. When co-workers get together to get work done, ideas need to take centre stage – not communication tools

SHARING

Teams need to be able to share ideas fluidly without interrupting the collaborative process.

CONNECTING

As collaboration becomes a given inside organisations, we're asking more of the tools that keep us connected.

COMPARING

Creating together means making comparisons, drawing conclusions and building a consensus.

SWITCHING

Presentations are one-sided; collaboration often requires switching back and forth among multiple points of view.
